

Errata A

Comtech EF Data Documentation Update

Subject: Add Force 1:1 Switch Remote Control Command

Date: August 25, 2003

Document: CDM-600 Satellite Modem Installation and Operation Manual, Rev. 5, dated March 11, 2002

Part Number: MN/CDM600.EA5

Collating Instructions: Attach this page to page 15-21

Comments:

The following new information is provided for Force 1:1 Switch. This information will be incorporated into the next revision.

Change Specifics:

Force 1:1 Switch	FSW=	None	<p>Command only. Forces the unit to toggle the Unit Fail relay to the "fail" state for approx 500ms. If the unit is a 1:1 pair, and it is currently the 'On-Line' unit, this will force a switchover, so the unit will then be in 'Standby' mode. The command is always executed by the unit, regardless of whether it is stand-alone, in a 1:1 pair, or part of a 1:N system.</p> <p>This command takes no arguments.</p>	FSW= (message ok)	N/A	N/A
